

FOR IMMEDIATE RELEASE

SECNAP Network Security Partners with Viyu Network Solutions

Leading Security VAR to Offer SpammerTrap Anti-Spam Products

Boca Raton, Fla. – May 20, 2008 – SECNAP® Network Security Corporation today announced it has formed a strategic marketing alliance with Viyu Network Solutions to offer the innovative line of SECNAP anti-spam products to Viyu customers. The product line includes SpammerTrap® customer-premise appliances ranging from SMB and SME models for smaller businesses to ENT and GEM models for enterprises and global organizations. Hosted SpammerTrap® is available for clients who prefer to outsource their email security solution.

“SpammerTrap is competitively priced to the low-end solution on the market, and yet can scale to the requirements of even the largest global enterprise,” said Gavin Adams, president of Viyu. “The device is very easy to install, and our sales staff appreciate the expert 24/7 support available from SECNAP Network Security.” Adams added that the Viyu sales team is enthusiastic about the addition and anticipates robust sales across the SpammerTrap product line.

Using a unique combination of software, databases and filters, SpammerTrap technology instantly performs more than 4,000 tests on each email, including anti-virus, phishing and malware tests. This extensive test battery eliminates false positives and ensures that only valid spam-free emails are delivered—helping to protect organizations and their networks, employees and customers from many forms of cybercrime.

About SECNAP

Founded in 2001 in Boca Raton, Fla., SECNAP Network Security is a leading provider of network and email security solutions for a wide range of businesses and global enterprises, delivering measurable results that translate to bottom-line savings for clients. In addition to SpammerTrap, SECNAP solutions include HackerTrap™, an innovative, patent-pending managed network security system that protects company assets, as well as expert Testing and Auditing services. SpammerTrap was named a Hot Product of 2008 at Everything Channel's XChange Solutions Provider Conference. SECNAP is a Technosium Hot Company of 2008. For more information, visit www.secnap.com.
